

SAFECEM Wins European Responsible Care® Award 2016 across All Categories

October 2016: SAFECEM was recognized by Cefic with the European Responsible Care Award ‘Product Stewardship Special Accenture Award’ for its Chemical Leasing business model, which unlocks the potential of Circular Economy.

The European Responsible Care Awards recognize chemical companies for their achievements of innovative and improved health, safety and environmental standards. Initiated by Cefic, the awards in different categories aim at stimulating and rewarding best practices within the European chemical industry.

SAFECEM received the European Responsible Care Award ‘Product Stewardship Special Accenture Award’ for its Chemical Leasing business model. Once developed by SAFECEM for metal cleaning customers, [COMPLEASE Chemical Leasing](#) helps to reduce solvent consumption essentially while improving the cleaning process and results. The model contains chemical product services along the solvent’s life cycle which help to optimize resource efficiency and intensify the re-use loop, thus contributing to a Circular Economy. The company “was overall winner across all categories [...] for its solution reducing up to 80% solvent content in the waste stream” states the [Cefic press release](#).
